

5

Abstract

The invention relates to an assembly tool for
5 assembling a sealing ring (3) in an annular groove (4, 9) of
a machine part (1, 7), in particular of a valve plate (7).
By the provision that the assembly tool (10, 23) includes a
pneumatic piston-cylinder unit (11, 12, 26, 27) for uniformly
10 press-fitting the sealing ring (3) into the annular groove
(4, 9), a simple assembly tool that is economical to make, is
versatile to use and can be used in mobile application, and
nevertheless enables reliable seal assembly without injuring
anyone.
